## RELEASE OVERVIEW

**Next Release (August, 2.82.0)**

### Schedule for major issues

| Month, version   | Major feature                               | Narrative                                                                                                  |
|------------------|---------------------------------------------|------------------------------------------------------------------------------------------------------------|
| August 2.82.0    | Dependency updates                          | Technical design document for diverse <a href="https://auth.peeringdb.com">auth.peeringdb.com</a> offering |
| September 2.83.0 | Publishing multiple set names unambiguously | Improvements for IRR AS-SET names and a new community field for RTBH                                       |
| October 2.84.0   |                                             |                                                                                                            |

### Main agenda

- `grizz@20c.com` To share a preview of the SLI dashboard.

- Could we do a better job of letting users know that we have new profile settings they might want to adjust when they login? E.g. The ability to see maps showing Advanced facility searches on the search results page.
- Review technical design: [Delete an IX when its last prefix is removed](#) (#1717)
  - Decision on confirmations
  - Decision on remaining facility connections
  - Decision on bringing an exchange back

- Review technical design: [Object Metadata — and a Departure Signal on netixlan \(#1751\)](#) and other issues)
  - Decision on why this mechanism
  - Decision on the netixlan state model
  - Decision on planned change semantics
  - Decision on Filterability in v1
- Review technical design: [Unambiguous IRR AS-SET Names \(#1973\)](#) and other issues)
  - Decision on forcing the prefix requirement on deploy day
  - Decision on live check mechanism
  - Decision on one uniform rule
  - Decision on the lookup backend
  - Decision on a default of one set object name
  - Decision on rejecting route-set names on update
- Review technical design: [Embedded Facility Maps on Entity Pages \(#1750\)](#)
  - Decision on map engine
  - Decision on scope
  - Decision on visibility
  - Decision on data delivery

| Number                | Title                                                    | Summary                                                                                          | Consent Finalized?    |
|-----------------------|----------------------------------------------------------|--------------------------------------------------------------------------------------------------|-----------------------|
| <a href="#">#2018</a> | No longer accept emoji's in PeeringDB                    | As title.                                                                                        | NOT YET               |
| <a href="#">#2021</a> | Distribute database via HTTPS                            | As title. <ul style="list-style-type: none"> <li>• Exists and needs to be advertised.</li> </ul> | See left              |
| <a href="#">#2025</a> | Alert users to choices they can make in profile settings | Avoid adding features that people can only use if they go into their profile and activate them.  | Deferred as new issue |

### Consent Agenda

Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

| Number | Title | Summary | Consent Finalized? |
|--------|-------|---------|--------------------|
|--------|-------|---------|--------------------|

|                       |                                                                                  |                                                                                                                                                            |          |
|-----------------------|----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <a href="#">#2000</a> | Catch empty responses from rdap.org when registering a new ASN                   | We could just get RDAP bootstrap from IANA instead of using <a href="#">RDAP.org</a> . But in the event of failures, we could handle them more gracefully. |          |
| <a href="#">#2003</a> | Improve UI                                                                       | It's hard to see which UI version is selected in your profile.                                                                                             |          |
| <a href="#">#2004</a> | About page links should go to the same place                                     | We have two separately maintained "About" pages.                                                                                                           |          |
| <a href="#">#2009</a> | Show all configured MFA device types on the CP user account page                 | Improve design of MFA management page.                                                                                                                     | YES      |
| <a href="#">#2010</a> | API specs page only documents Basic Auth as authentication method                | Better docs.<br><ul style="list-style-type: none"> <li>Better docs will be merged.</li> </ul>                                                              | See left |
| <a href="#">#2011</a> | .meta.error information not documented in api-schema.yaml, or main API docs page | Better examples in docs.<br><ul style="list-style-type: none"> <li>We'll merge the two API doc locations and contents.</li> </ul>                          |          |
| <a href="#">#2015</a> | Add an RSS/Atom feed for the Blogs section (docs.peeringdb.com)                  | As title.                                                                                                                                                  |          |
| <a href="#">#2022</a> | Enable OIDC RP-Initiated Logout (end_session_endpoint)                           | Enable django-oauth-toolkit's OIDC RP-Initiated Logout for a smoother logout process.                                                                      | YES      |

### Informational

No action required. Members should be aware that these new issues have been agreed since the last meeting.

| Number                | Title                                                             | Bug? | Summary                                               |
|-----------------------|-------------------------------------------------------------------|------|-------------------------------------------------------|
| <a href="#">#2020</a> | Improve resilience of search in ES pods                           | No   | Make search resilient when an ES pod isn't available. |
| <a href="#">#2017</a> | Map pins should show facility name in Advanced Search in page map | Yes  | As title.                                             |
| <a href="#">#2002</a> | Another search anomaly                                            | Yes  | Extra space in search terms impact results.           |

|                       |                                                                          |     |           |
|-----------------------|--------------------------------------------------------------------------|-----|-----------|
| <a href="#">#2019</a> | Not all logged in users see the map option in Advanced Search> Facilitie | Yes | As title. |
|-----------------------|--------------------------------------------------------------------------|-----|-----------|
